

... memorize the five different **shapes** in their respective **colors**.

... shapes can change their color during the following **updating** phase. Always remember the **current color**. Here, from now on, you have to remember the **diamond in orange** instead of in red.

... from now on, remember the **circle in blue** instead of orange.

... the **triangle** also changes its color. From now on, remember it in **pink** instead of green.

During the **recall** phase, select the color the shape has last been presented in by **clicking** on the **color**. In this example, you'd have to select the **blue circle**.

Accordingly, you'd have to select the **pink triangle**...

... and the **orange diamond**. In the actual test, you'll be asked to recall all colors for all shapes.
